GLACIER SERIES

The Glacier Series represents Spina Optics’ flagship line, now upgraded to its second generation for enhanced precision and reliability. Featuring high-quality ED low-dispersion lenses and a first focal plane (FFP) design, the series maintains accurate reticle scaling across all magnifications.

The upgraded design includes user-friendly zero-stop adjustment, durable aluminum construction, and precision control knobs, combining performance with ease of use. Additionally, Glacier scopes are built to be waterproof, fog-proof, and shock-resistant, providing stable optical support in demanding environments.

NOVAFORCE

Every NovaForce riflescope is designed with our core mission in mind: to create a scope that combines high precision, exceptional durability, and ease of operation. We believe that only through accuracy and stability can we help every shooter push their limits and break through barriers.

Whether in the intense competition of the shooting range or the high-demand environment of a sniper mission, NovaForce provides unmatched support, ensuring you hit your target with precision every time.

The ApexFin series is designed specifically for hunters, featuring precise reticles that allow for quick aiming and adjustment at various distances. Its ultra-wide-angle lenses provide an expanded field of view, enabling hunters to effortlessly track moving targets, whether in dense forests or open terrain.

The lenses are multi-coated to ensure clear imaging and high light transmission, allowing for excellent visibility even in challenging lighting conditions. With a compact and robust construction, the riflescope remains reliable during extended use in outdoor environments.

FULLY MULTI-COATED

High-transmittance full-coverage multi-coated technology significantly enhances light transmission, reduces reflections and glare, delivering a clearer and brighter view. Whether day or night, it ensures superior optical performance.

WATERPROOF

Whether in rainy, snowy, or highly humid environments, our products provide you with ultimate protection. With an IPX7 waterproof rating, they can withstand brief immersion in water, ensuring your device remains stable and functional under extreme conditions.

WOLFCHASE

With a first focal plane (FFP) design, the reticle scale adjusts with magnification, ensuring accurate range estimation across all power settings for precise shooting.

Built with a rugged structure, the Wolfchase series is waterproof, fog-proof, and shock-resistant, delivering reliable performance in harsh environments—a true ‘wolf pack hunter’ in the field.

TRICORE

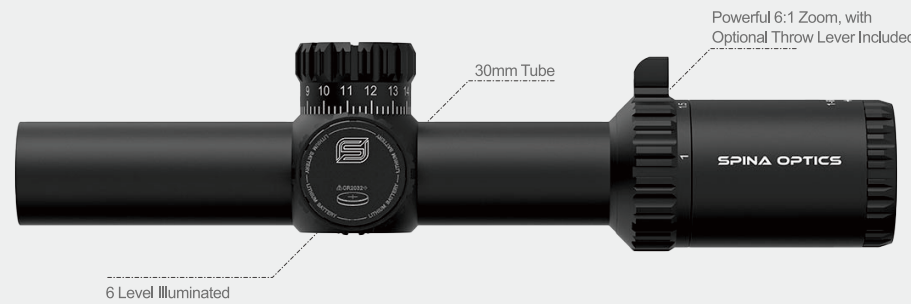

The TRICORE Series is a high-performance rifle scope line designed specifically for medium- to long-range shooting, while meeting the demands of both hunting and tactical applications. The series features a high-quality optical system that delivers clear, stable image quality across different magnification levels, while its precision adjustment mechanism ensures accurate and consistent windage and elevation adjustments. The well-balanced magnification options provide the flexibility needed for everything from rapid target observation at shorter distances to precise aiming at medium and long ranges, while maintaining a practical balance between field of view and target identification.

The RipTide Gen II is built for precision airgun shooting at medium to long distances, addressing real-world challenges such as difficulty seeing small targets clearly, inconsistent holdovers when changing magnification, and losing track of your original zero after repeated adjustments. ED glass provides sharper image clarity and better detail at extended distances, while the FFP keeps holdovers and ranging references consistent throughout the magnification range. The Zero Stop also allows you to quickly and reliably return to your original zero after making elevation adjustments. Available in 3-12X44 and 4-16X44, RipTide Gen II is designed for shooters who repeatedly adjust for different distances and demand consistent accuracy and a predictable shooting experience.

NEX-TH

NEX-TH is a compact thermal sight designed specifically for handguns, allowing rapid target acquisition even in complete darkness. Its body is compatible with RMR and RMSC footprint mounting plates, ensuring seamless integration with most mainstream handguns. The lightweight design and intuitive operation provide shooters with thermal imaging advantages while maintaining handgun maneuverability, making it ideal for night training, duty patrols, and tactical scenarios.

NEX-SOLAR

The NEX series features an internal tube design, offering a robust structure while remaining lightweight and compact, making it adaptable to various weapon platforms. With a side-mounted high-capacity CR2032 battery, it supports dual power modes—solar and battery—for extended operation and greater tactical efficiency. Its unique dual reticle system allows shooters to quickly adapt to both short- and long-range engagements. Designed with a standard RMSc footprint, it ensures seamless mounting for enhanced pistol performance.

Whether for tactical missions or competitive shooting, the NEX is your ultimate reliable companion.

7075 STRAIGHT MOUNT WITH PICATINNY RAIL 34/30MM RING

BL0035 BL0040

Made from high-strength 7075 aluminum alloy, it combines lightweight performance with excellent structural strength, providing a stable and reliable mounting platform for your optic. Available in 30mm and 34mm configurations to fit different scope tube sizes.

7075 34MM MOUNT

BL0037

Made from high-strength 7075 aluminum alloy, it combines lightweight performance with excellent structural strength, providing a stable and reliable mounting platform for your optic.

CANTILEVER MOUNT 25.4MM/30MM/34MM RING

BL0034

A 3-in-1 universal mount designed to fit 25.4mm, 30mm, and 31mm scope tubes. It offers flexible compatibility in a single mount, making it easy to switch between different optic sizes while maintaining a secure and stable setup.

TDG-30 CANTILEVER MOUNT

BL0038

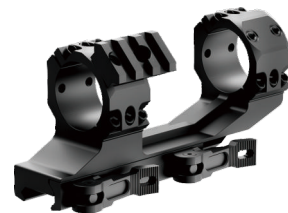

A 3-in-1 universal mount designed to fit 25.4mm, 30mm, and 31mm scope tubes. It offers flexible compatibility in a single mount, making it easy to switch between different optic sizes while maintaining a secure and stable setup.

TDG-30 CANTILEVER MOUNT

BL0039

An integrated quick-detach mount designed for fast and secure optic installation. Its built-in side rail allows a red dot sight to be mounted at a 45° offset, providing a seamless transition between your primary optic and backup sight without the need for an additional mount.

TDS-30 CANTILEVER MOUNT

BL0036

Made from lightweight and durable 6061 aluminum alloy, this mount offers a reliable balance of strength and weight. Available in a variety of color options, allowing you to match different setups and personal preferences.

ANGLE-34 MATCHED RING

BK0018

Crafted from high-strength 7075 aluminum alloy, this 34mm mount combines durability with a secure, lightweight design. The side-mounted rail allows you to add a red dot sight at an offset position, providing a convenient secondary aiming solution without compromising the primary optic setup.

TX-34 MATCHED RING

BK0037

Designed for 34mm scope tubes, this low-profile mount is made from high-strength 7075 aluminum alloy for a strong yet lightweight setup. Its versatile rail system supports three mounting positions—top, left 45°, and right 45°—giving you flexible options for mounting a red dot sight or other accessories.

TDF-34U ADJUSTABLE-HEIGHT MATCHED RING

BK0035U

TDF-34U is an adjustable-height mount designed for 34mm scope tubes, allowing users to fine-tune the optic height for a more comfortable and personalized setup. Its adjustable design provides greater flexibility when matching different rifles, platforms, and shooting positions.

VTX-34 TITANIUM ALLOY MATCHED RING

BK0027

Designed for 34mm scope tubes, this low-profile mount is crafted from titanium alloy, offering an excellent balance of strength, durability, and lightweight performance. Its low-profile design helps maintain a lower optic height for a more streamlined and comfortable setup.

TP-34H MATCHED RING

BK0036

Designed for 34mm scope tubes, this mount is made from durable 6061 aluminum alloy, offering a solid balance of strength, reliability, and lightweight performance. Its high-profile design provides additional clearance and a comfortable optic height for a wide range of setups.

TDF-30U 30MM ADJUSTABLE ELEVATION MATCHED RINGS

BK0026U

Designed for 30mm scope tubes, this adjustable-height mount is crafted from durable 6061 aluminum alloy, offering a reliable balance of strength and lightweight performance. The adjustable design allows users to fine-tune the optic height for a more precise and comfortable setup across different platforms.

TDF-30P 30MM ADJUSTABLE ELEVATION MATCHED RINGS

BK0026P

Designed for 30mm scope tubes, this adjustable-height mount is crafted from durable 6061 aluminum alloy, offering a reliable balance of strength and lightweight performance. The adjustable design allows users to fine-tune the optic height for a more precise and comfortable setup across different platforms.

TDF-30D 30MM ADJUSTABLE ELEVATION MATCHED RINGS

BK0026D

Designed for 30mm scope tubes, this adjustable-height mount is crafted from durable 6061 aluminum alloy and designed for dovetail rails. It offers a reliable balance of strength and lightweight performance, while the adjustable height allows users to fine-tune the optic position for a more precise and comfortable setup.

TDE-30 CANTILEVER MOUNT

BK0032

BK0033

BK0034

Designed for 30mm scope tubes, this mount is made from durable 6061 aluminum alloy and features an integrated bubble level for easier and more consistent optic alignment. Available in low, medium, and high configurations, with a top rail for mounting accessories such as a red dot sight or other compact optics.

MATCHED RINGS 25.4MM/30MM/34MM

BK0017

Designed as a 3-in-1 universal mount, this mount offers compatibility with 25.4mm, 30mm, and 31mm scope tubes. Built for flexibility and convenience, it allows users to switch between different optic sizes while maintaining a secure and stable installation.

TDR-30 MATCHED RING

BK0023

BK0022

Designed for Picatinny rails, this mount is crafted from durable 6061 aluminum alloy and features an angled mounting design for a secure and stable optic setup. Its lightweight yet sturdy construction provides reliable performance while maintaining a clean, low-profile profile.

TDV-30 DOVETAIL MATCHED RING

BK0029

BK0030

Designed for dovetail rails, this mount is crafted from durable 6061 aluminum alloy and features an angled mounting design for a secure and stable optic setup. Its lightweight yet sturdy construction provides reliable performance while maintaining a clean, low-profile appearance.

TPV-30 DOVETAIL MATCHED RING

BK0019

BK0020

BK0021

Designed for 30/25.4mm scope tubes, this mount is compatible with dovetail rails and made from durable 6061 aluminum alloy. Available in low, medium, and high configurations, it provides flexible optic height options for different platforms and shooting preferences.

TP-30L MATCHED RING

BK0027

Designed for 30mm scope tubes, this mount is compatible with Picatinny rails and made from durable 6061 aluminum alloy. Available in low, medium, and high configurations, it provides flexible optic height options for different platforms and setup preferences.
